铸钢部由万凯合资成立于2025年3月，拥有独立的铸钢开炉，浇注等设备，配置有修毛刺，挥模，执夹口师傅等，能够独立完成铸钢模具的制作。

铸钢部将在2026年合并入新的模厂，届时设备和相应人员配置都有相应的提高和增加。

预计每月可制作400盒铸钢产品，大约2吨的产品。

The Cast steel Department was jointly established by Wan Kai in March 2025. It has independent equipment for casting steel furnaces, pouring, etc., and is equipped with technicians for deburring, mold swinging, and clamping, etc. It is capable of independently completing the production of cast steel molds.

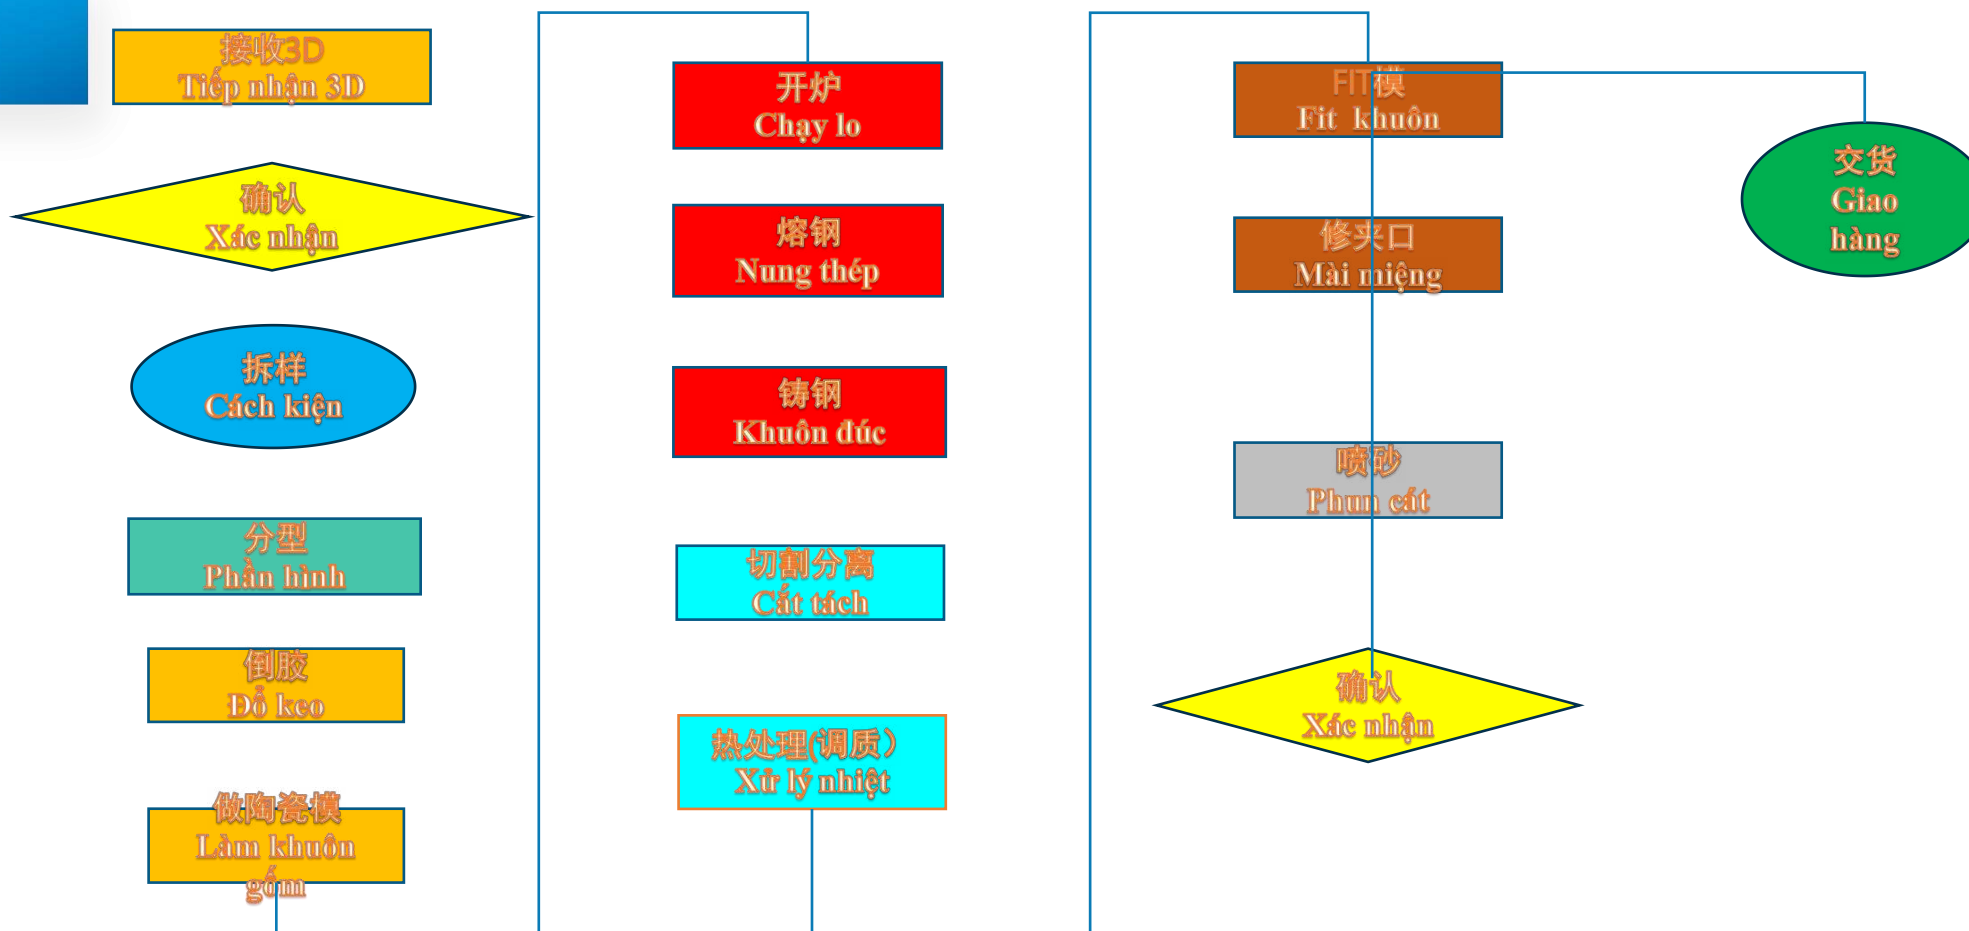

The cast steel department will be merged into a new mold factory in 2026, and at that time, both the equipment and the corresponding personnel allocation will be improved and increased accordingly.

It is estimated that 400 boxes of cast steel products can be produced each month, approximately 2 tons of products.

Executive Summary

Fita works with GFT, First Union, Musical, Dream, MB (A factory) currently, to EP stage only. FEP will be handled by factory itself.

Fita will receive the digital documents from Hasbro or factory to start the molding, all will be saved in Fita shared-drive and set the access control to Engineering department only. Fita claimed there is no need to take photo of IP sample and transfer the digital IP asset to outside party, but auditor emphasized the importance of watermarking and digital IP asset transmission in a secure way, esp. email is not allowed. The related log is available within Fita

Mr. Hou is the only person to receive the Hasbro/factory's digital document, and his desk is located in 2nd floor - office. In another building, the 1st floor is the Injection workshop, the mold making workshop (using CNC machine), and the mold modification workshop, the 2nd floor is the mold-polishing workshop, the 3rd floor is the Wire EDM (线切割) workshop.

Pls see the finding summary as below -

•Internal Transfer Log: □ There is no internal transfer log for G33995X01 from the injection molding shop to the engineering department; □ Fita's internal transfer log are not kept both by sending/receiving party
